Box I	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)			
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:				
1.	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:			
2. X	Claims Nos.: 7-9, 12-15, 18-20, 23 and 24 (all partially) because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically: see FURTHER INFORMATION sheet PCT/ISA/210			
з. 🗌	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).			
Box II	Observations where unity of invention is lacking (Continuation of item 2 of first sheet)			
This Inte	rnational Searching Authority found multiple inventions in this international application, as follows:			
	see additional sheet			
1.	As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.			
2.	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.			
3.	As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:			
4. X	No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: 1-33 (all partially)			
Remark	The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.			

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.2

Claims Nos.: 7-9, 12-15, 18-20, 23 and 24 (all partially)

Claims 7-9, 12 and 13, and 14, 15 and 18-20, refer to kits/arrays, respectively, for identifying an OR gene or variant thereof, comprising at least an oligonucleotide suitable for identifying it. The claims cover all kits/arrays comprising oligonucleotides having this characteristic or property, whereas the application provides support within the meaning of Article 6 PCT and/or disclosure within the meaning of Article 5 PCT for only a very limited number of such kits/arrays. In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible. Consequently, the search has been carried out for those parts of the claims which appear to be clear, supported and disclosed, namely those parts relating to SEQ ID Nos. 1-104.

The above reasoning also applies to claims 23 and 24, which refer to methods of typing a subject, wherein the methods comprising detecting the presence or absence of allelic variants of OR (pseudo)genes. For the above mentioned reasons, the search has also been limited to those parts relating SEQ ID Nos. 1-104.

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure. If the application proceeds into the regional phase before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guideline C-VI, 8.5), should the problems which led to the Article 17(2) declaration be overcome.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-33 (all partially)

Invention 1

Oligonucleotides (constructs) corresponding to SEQ ID Nos. 1, 27, 53 and 79; kits, arrays and cells comprising them; and methods using them

2. claims: 1-33 (all partially)

Invention 2

Oligonucleotides (constructs) corresponding to SEQ ID Nos. 2, 28, 54 and 80; kits, arrays and cells comprising them; and methods using them

Inventions 3-26

Ibidem for SEQ ID Nos. 3-26, 29-52, 55-78 and 81-104, respectively
